Professional Summary

Frontend Engineer with 3.7+ years of experience in React.js, TypeScript, and Redux, building scalable, high-performance single-page applications. Specialized in data visualization and Canvas/SVG rendering, improving BI tool performance by 40% at Lumel Technologies. Strong expertise in state management, performance optimization, and modular UI design within Agile environments. Immediate joiner, open to relocation.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Redux, Zustand, D3.js, Tailwind CSS, Lodash, Material UI

Testing: Jest, React Testing Library

Cloud & DevOps: AWS (IAM, EC2), CI/CD Pipelines

APIs & Auth: REST APIs, GraphQL, JWT, OAuth 2.0

Tools & Platforms: Git, GitHub, Webpack, Babel, NPM, Yarn, Vite, Figma

Concepts: SVG Rendering, Canvas API, Geometry Algorithms, Browser Rendering, Rendering Pipelines, Hit Testing, Data Visualization, Agile/Scrum

Performance: Code Splitting, Lazy Loading, useMemo, React.memo, requestAnimationFrame

Experience

Lumel Technologies Inc.

July 2023 – February 2026

Associate Product Developer (Frontend)

Chennai, Tamil Nadu

- Engineered core visualization features for Inforiver Charts (Power BI custom visual) using React and TypeScript, architecting a custom hybrid Canvas/SVG rendering engine that enabled fluid 60fps rendering of 100k+ data records while reducing browser paint latency by 40%.
- Developed 5+ mission-critical data controls — including dynamic X/Y-axis filtering and custom zoom/scroll logic — and enhanced 100+ SVG, Canvas, and iframe-based chart modules to power high-density enterprise dashboards.
- Designed and integrated a real-time collaborative commenting system with centralized state management, synchronizing annotations seamlessly across multiple data visualizations.
- Executed rigorous performance profiling and resolved 500+ production-level bugs, increasing system stability by 15%, reducing technical debt, and maintaining high-fidelity interactivity across all chart components.

Arus Info Pvt. Ltd.

July 2022 – June 2023

Frontend Developer

Chennai, Tamil Nadu

- Optimized complex data-grid rendering within the ValQ planning tool, reducing UI lag by 25% for enterprise users handling multi-dimensional financial forecasts.
- Re-engineered underlying logic for the Variance Tab feature, improving data calculation speeds by 30% and enhancing user experience.
- Standardized the frontend codebase using TypeScript, reducing production-level type errors by 20% and improving overall team development velocity.

Projects

Krishi Bazar – B2B Digital Mandi | *Next.js, TypeScript, Redux, Tailwind CSS v4, Material UI*

June 2026

- Developed a Next.js dual-portal application with role-based workspaces (Farmer/Merchant) and real-time Mandi price catalog feeds, reducing user onboarding steps by 40%.
- Engineered a Redux Toolkit state engine managing 4 B2B transactional states (bids, inventory, escrow, shipments), ensuring sub-100ms state updates during concurrent agricultural deal locking.
- Integrated Google OAuth and a geolocation database with API fallback mechanisms to enhance user profile verification and registration reliability.

DocStetho – Healthcare Analytics Dashboard | *React, TypeScript, Zustand, GraphQL, Canvas API*

May 2026

- Developed a high-performance clinical monitor using HTML5 Canvas to render 3 simultaneous biometric waveforms at 60 FPS utilizing requestAnimationFrame and custom mathematical formulas.
- Architected global state management using Zustand to coordinate 4 distinct slices (Auth, Settings, Patients, Appointments) with persistent local storage caching for offline access.
- Reduced dashboard file size by 70% and optimized load times by refactoring monolithic code into 5 modular tab components using React.lazy and Suspense code-splitting.

Education

Maryland Institute of Technology and Management

August 2018 – April 2022

Bachelor of Technology (B.Tech) in Computer Science

Jamshedpur, Jharkhand
